Rosewood 🐾
It's a pet thing!

Welcome

We've been in the business of keeping dogs, cats, birds, rabbits, hamsters, fish – in fact all sorts of pets – happy for over 60 years, but nobody could have prepared us for the challenges of the last 18 months. During this time, we have endeavoured to keep positive and supply our customers with some level of normality in the worst possible circumstances, inclusive of Brexit, freight, and the ongoing COVID-19 situation. That aside, 2022 is a new beginning and will include the launch of lots of newness and innovation.

We know your customers regard their pets not as animals, but as part of the family. We do, too. That's how it should be. They're pet parents, not merely owners. That's an emotional commitment, not just a physical one. Well guess what, we regard every one of our customers as part of our family. It's a family and a business that stretches all around the world. Our core values are included within our catalogue as well as communicated in every part of our business, every employee works to and understands these values.

Here, in our new catalogue, you'll find all the reasons why you should stock Rosewood products, whether they're branded or Rosewood. You'll see fantastic range, innovation, new product development, value, quality, in-depth knowledge

and great ideas. You'll see profitability; easy availability and the ability to order online via our Marketplace. This makes it quick and easy for you to place an order in just a few clicks and at a time that suits you!

We also have a brand new interactive flipping book, allowing you to easily navigate all our product categories including the ability to easily flip to video content and product details.

You'll see a passion for giving you the kind of products you want to sell – and giving your customers the kind of products, they want to buy. We believe that happy suppliers mean happy and loyal customers, and that means happy and healthy pets.

Our Pet Parent Club now has over 10K followers and offers early access to new line information as well as one off promotions. For information regarding social activity, join or access via our website or through our new catalogue.

That's why Rosewood is more than just a product thing. It's even more than just a business thing.

It really is a pet thing!

NATURAL EATS FOR DOGS

Our Natural Eats dog treats are made using the finest cuts of natural 100% meat! The products are made from pure meat and contain absolutely no meat derivatives. The vast majority of the range is also grain and gluten free.

We have widened our offer of natural treats to include new meat varieties. We have also introduced products new to the market such as our Tasty T-Bone Steaks. Our bigger value packs of core selling lines are brilliant value for money and are sure to be best sellers.

DAILY EATS COLLAGEN TREATS

Introducing Rosewood Daily Eats Collagen Dog Treats!

It is a fact that collagen makes up between 70-90% of a dog's muscles, tendons and ligaments. Whilst dogs will naturally create collagen from certain nutrients often, they do not create enough especially as they start to get older.

With this in mind, Rosewood has specially developed 100% Natural Collagen treats. We have extracted the collagen from grass fed cattle and to guarantee palatability we have lovingly coated every treat with either delicious chicken or beef – every treat is rich in either chicken or beef – every treat is rich in either chicken or beef. All our Collagen treats are specially manufactured for Rosewood in South America.

The treats help improve muscle and joint mobility and promote healthy skin, coat and clean teeth. They are fully digestible unlike rawhide. So not only are they delicious, they are healthy too!

Our Collagen treats are available in various shapes and sizes with something for every size and breed of dog.

The products are packed into full colour display boxes and with recommended retails starting from £1.50 they are a great daily purchase for all dog owners.

DAILY EATS FOR DOGS

Our Daily Eats dog treats is a range of best-selling, fun everyday dog treats. The specially designed shape and texture of the treats help clean teeth and gums and all have added calcium. All are made with delicious chicken which makes them so much more palatable than meat free equivalents. Of course the Veggie treats are meat free, the chicken replaced with carrot and broccoli. All are grain and gluten free.

All the loose treats are individually tagged for easy barcode scanning and all are packed into full colour shelf ready display boxes. The meaty sticks and toothbrushes are also available in larger consumer resealable value pouch packs

Dog Bed-time

Cosy and practical. The quilted navy bed is extremely comfortable due to its padded inner and sides. It is also water resistant with a reversible cushion.

Another addition to the 40 Winks Bedding range are our Luxury Fleece Lined Plush items. Our round bed provides warmth to pets during the cooler months. The smaller size is also ideal for cats. The Luxury sofa bed provides not only comfort but firm, even support. The cover is removable, making it easy to keep clean.

In addition to the beds, we have introduced a blanket in 2 sizes offering a variety of uses in the home or on the go; stylishly finished with a paw-print.

All beds are individually bagged and packaged with a Rosewood heart swing tag.

ECO LINE RECYCLED

Plastic is an amazing material, but 300 million tonnes of consumer plastic is produced every year, half of this is "single-use". It's estimated over 8 million tonnes are dumped into the oceans and a lot of the rest can end up in landfill. Consumers are now alert to the issues and are much more willing to accept and often embrace "greener" alternatives.

A UK first, our Eco Line products are made from 100% recycled plastic, most of it post-consumer waste (recycled shampoo bottles and food containers for example). Additionally, these PP/PE recycled-plastic products can then be recycled at the end of their life.

Made in Italy, the plastic is robust, in some ways more robust, as it has a little more flex than virgin plastic and the prices are fantastic: the only compromise is occasionally seeing a small degree of marbling to the colour.

Plastic beds

Our plastic dog beds are made from 100% recycled plastic. The smallest is made from the equivalent of 20 x 1L bottles, the medium from 40 bottles and the large from 70 bottles. The beds are hard wearing with a wide rim, ventilated base and rubber feet - ideal for hard floors. The blue colour is both practical and attractive.

The beds look even better with our Rosewood All Seasons or Tough and Mucky mattresses which they co-ordinate with perfectly.

40 WINKS SONNY BED MATTRESSES

Our plastic beds deserve equally stylish and practical mattresses, so to compliment both the Sonny and Eco Line beds (as well as those of other brands) we developed two mattress ranges in fabrics which work brilliantly with all five bed colours. Available in up to four sizes, they fit the four larger sizes of Sonny bed perfectly and are a good fit for the three Eco Line sizes. They are also double-sided, so you get to offer your customers a choice of four colours in just two skus!

All Seasons

Embracing the trend for all things grey (and because it works so well with so many other colours) one side of these practical and hardwearing mattresses uses our unique dog print whilst the other has a stylish "linen" effect. Ideal for use in other brands of bed or even on their own and machine washable to 30°C.

Tough & Mucky Water Resistant

The rich navy with a bespoke pale blue with a hint of grey reverse makes our new Tough & Mucky as stylish as it is practical. It's so easy to wipe off mud or pet hair, plus, the material resists rips and tears. Like the All Seasons, it's also deep filled to offer great comfort. Available to fit the three larger sizes of Sonny bed, but equally at home when used as a stand-alone mattress/bed. Wipe clean or machine washable at 30°C.

Tall Tails provides baby quality blankets & bedding for dogs of all shapes and sizes. Give your furry friend the cozy comfort they deserve at home or wherever they go with the premium-quality bedding; including dog blankets, dog throws and crate beds. The entire line of sleep products are designed for easy care including machine wash and dryable dog beds and blankets.

Bath time can be a very stressful and traumatic experience for dogs often due to the bathtub's slippery surface. The Tall Tails Wet Paws Bath Mat prevents that from happening by creating a safe environment for your pup. Our mat's loofah-like surface, combined with 6 suction cups and a non-skid backing, keeping the mat securely in place while giving your dog's paws a soft surface to grip onto. The result is a stress-free bathing experience for your dog! In addition, our Bath Mat captures your dog's hair on the surface, helping to prevent your drain from getting clogged. Post-bath time clean-up is easy as the hair can easily be clumped up and removed, making bath time easier on you too!

BIOSAFE™ GERM SMART DOG TOYS

BioCote Protected. A more hygienic toy for your pet and your family.

BioCote is an antimicrobial technology.

An antimicrobial is something that prevents the growth and survival of microbes including bacteria, mould and fungi.

BioCote technology protects surfaces from microbes resisting the potentially negative impact they can have on a product, resulting in a number of benefits.

BioCote technology will:

- Make a product more hygienic, if it is likely to host microbes harmful to human health.
- Keep a product fresher for longer, if it is likely to host odour-causing or staining microbes.
- Extend the usable lifetime of a product, if it is likely to host microbes which might degrade the surface.

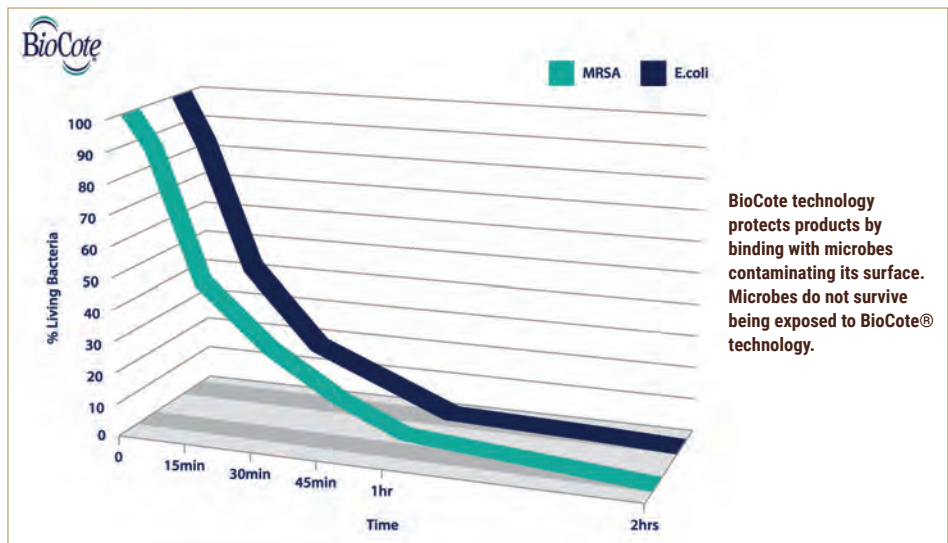

What does BioCote technology do?

BioCote technology provides long-lasting protection to a product by creating a surface upon which microbes cannot survive. It therefore reduces the level of microbes on a surface.

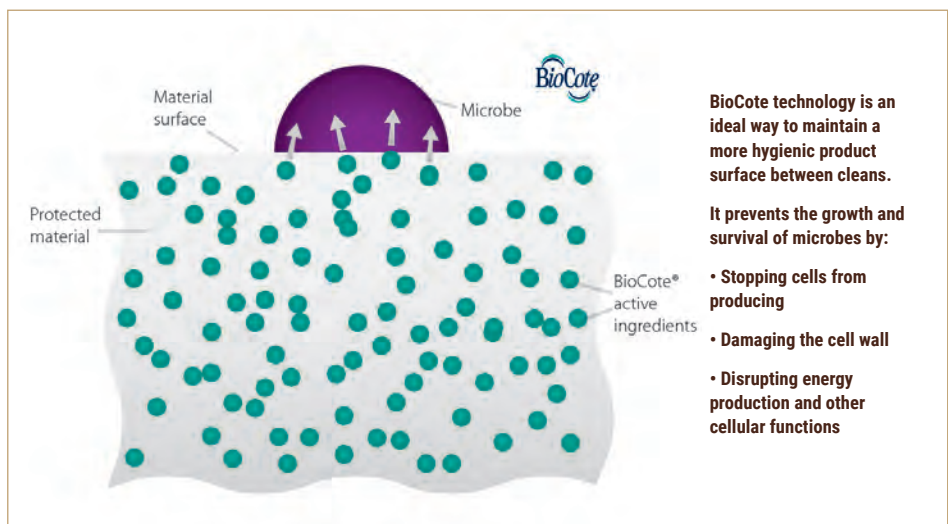

Lower levels of bacteria means improved hygiene and reductions in staining, odours and premature degradation of materials.

BioCote technology:

- Is proven effective against a wide range of bacteria, fungi and the H1N1 virus
- Reduces microbes by up to 99.99%
- Significant reductions within 15 minutes
- Up to 99.5% reduction in just 2 hours
- Works continuously for the expected lifetime of the product

BioCote technology protects products by binding with microbes contaminating its surface. Microbes do not survive being exposed to BioCote® technology.

BioCote technology is an ideal way to maintain a more hygienic product surface between cleans.

It prevents the growth and survival of microbes by:

- Stopping cells from producing
- Damaging the cell wall
- Disrupting energy production and other cellular functions

Puppy

Following the success of our Biosafe puppy range, the range is now available in pink. The pink Biosafe puppy range retains all the same features and benefits of the original puppy Biosafe; the only difference is the colour. It has great appeal to female puppies and owners and the range will look fantastic in-store merchandised together.

BioCote technology makes the Biosafe range hygienic, keeping it fresher for longer and extending the usable lifetime of this product. It massages gums and helps reduce plaque and tartar build up.

Perfect for puppies and small dogs.

The range has grown along with its success and it now comprises of ten lines available in pink or blue.

The treat dumbbell and treat ball are a great way to introduce training to puppies and small dogs at an early age.

The toys massage gums and help to reduce plaque and tartar build up. They are constructed out of a tough, yet soft material, are treated with a mint scent and they even float too!

Dog Play-time

AROMADOG™

Aromadog toys can help soothe separation anxiety and hyperactivity. Made with a lavender-based blend of 100% therapeutic-grade essential oils to help calm your dog. Releases aroma with each play and squeak. Ideal toys for pets as life gets back to normal, helping pets deal with separation anxiety.

Using patented technology combined with natural aromatherapy, Aromadog toys are designed to aid in keeping your pet calm and happy throughout the day. Developed by professional aromatherapists, to create a revolutionary new concept in squeaky dog toys. Made with 100% therapeutic-grade blends, every play and squeak releases a calming blend of essential oils into the air – helping your dog associate their Aromadog toy with feeling relaxed and happy. With a soothing effect on the natural canine instinct to play and sniff, Aromadog can calm your dog for various situations or conditions such as hyperactivity, separation anxiety, night pacing, thunderstorms, vet visits, travel anxiety, boredom and fireworks.

Nine toys in the range all with informative packaging for impactful display.

Aromadog Calming

Calming Aromadog toys help with physical issues such as hyperactivity, repetitive behaviour, night pacing, separation anxiety, destructive nervousness and stressed caused by thunderstorms. Chill Out Oil is a fast-acting, powerful blend of lavender, sweet marjoram and chamomile that can help calm and quieten pet nervousness.

Aromadog Rescue

Rescue toys help with emotional trauma and experiences that are difficult to work through. Fearfulness, betrayal, rage, abandonment, grief and depression are emotions that must be overcome for a healthy life. Rescue toys help the dog transition through mentally challenging times to becoming balanced and optimistic with an oil mixture of cypress, ylang ylang, lavender, spikenard and neroli. No-stuffing toys and security blanket are included in the range.

Aromadog Senior

Senior blend is very different and very specific to older dogs. Just like people, they lose their memory and quality of life, becoming absent-minded and confused with poor physical performance. They lack energy and don't seem to have the drive to get up and explore a new scent, very often losing their appetite. The Senior blend targets each of these symptoms, enhancing their quality of life with an oil mixture of rosemary, peppermint, bergamot, black pepper and ylang ylang. Selection of mini fleece, ring and floppy toys.

AGILITY

Our agility range is perfect for a family's own fun and enjoyment in the garden but equally as good to use for practice for those looking to join an agility club. The kits are lightweight for safety, and are quick and easy to assemble.

All, except the Flyball, come with a carry bag. The Hurdle and Hoop Jump are adjustable for different sizes and abilities. The packaging also details how to use the equipment with additional training tips so owners and pets get the most from each piece. Why not persuade your customers to try one product first to help build confidence, then, if desired, add more pieces to create their very own agility course.

Combs

A selection of combs to remove knots and tangles, as well as combs specifically designed to tackle problems such as matting, fleas, nits, debris and ticks. Regular combing is recommended as it stimulates a coat's natural oils leading to a healthy, shiny coat.

Our De-Matting Comb is designed to remove matts with minimal loss of coat length. The blades are specially shaped for effective cutting and feature small teeth which collect loose hair.

Our Tick Remover is vital for easy and effective removal of ticks. It allows pet owners to ensure that any ticks are gripped securely and can therefore be carefully lifted away from the skin and disposed of.

AQUAPAW

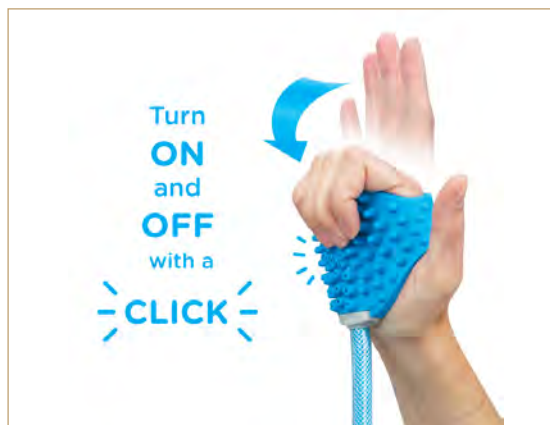

Exclusive to Rosewood, Aquapaw's products are thoughtfully designed to help eliminate the mess and the stress involved in one of the hardest parts of pet ownership, bathing.

The Aquapaw Bathing Tool is the world's first wearable combination sprayer-scrubber that can be turned on and off by simply making a fist. This unique design allows you to stay in total control over your pet and the flow of water during the entire bathing process. A showerhead adapter (indoor) and garden hose (outdoor) adapter are included, and installation is quick and easy.

The Aquapaw Slow Treater helps persuade pups to get in the tub and keep them there. Simply spread their favourite treat in its center and stick it to any smooth surface. The rubber nubs will help extend how long they will enjoy it.

POOP BAGS

Our compostable poop bags are made from bioplastics that use substances obtained from plants, such as corn starch. These bags will biodegrade into carbon dioxide, water, and biomass by at least 90% in 180 days in standard composting conditions leaving no harmful residues behind. As well as the environmental credentials, the bags are extra strong and larger than the standard poop bag.

Our degradable doggy bags are 50% thicker than your average bag. They also have tie handles and are lemon scented.

MP BERGAMO

Gastone Puppy Pad Holder

Puppy pads are great, but have their "issues" when used alone. Our holder, from MP Bergamo, overcomes these by helping to prevent dogs from tearing and playing with pads and preventing leaks, protecting hard floors and carpets. With non-slip feet they also stop movement and slipping, especially on hard floors.

Suitable for any brand of pad 54 x 54cm or larger - the holder even comes with two free pads!

SILVERVINE CAT TOYS

Fun cat toys which contain silvervine, a natural attractant known to induce a very playful reaction in cats; it's even better than catnip!

Silvervine is a non-toxic plant which is grown in mountainous areas of Japan. It is known to give cats a similar euphoric response to catnip, honeysuckle and valerian but is typically more intense and lasts for approximately five to twenty minutes.

The range includes plush fur teasers for interactive fun as well as silvervine mice, plush balls and rattan balls, all perfect for encouraging healthy exercise and play.

ECO LINE RECYCLED

Pet Carriers

To match our plastic beds, these carriers are also made from 100% recycled plastic, and can be recycled at the end of their life.

Our small Eco Line plastic pet carrier is made from the equivalent of 30 x 1L bottles, the medium from 50 bottles. The door can be opened from the left or the right and the carriers are easy to clean and store (the top can nest into the bottom). The two-tone colour is practical and attractive and both sizes have integral seat belt clips. The small is suitable for smaller cats and dogs; plus, rabbits, birds and other smaller pets. The medium is for cats, small dogs, larger rabbits and other pets.

Cat Training & Control

Hooded toilets offer a more discreet and desirable alternative to open trays for both pet and owner. But as modern litters typically mean that only solids and soiled litter need to be removed each day it's an advantage to use front opening toilets, like both our Ariels, rather than having to remove the whole hood, as you would with the Romeo. Both Ariel models also come with extra deep bottoms, a replaceable carbon filter, an integral scoop and are available in wonderful, contemporary colours.

Both come nested as ready to sell sets and featured improved clips and new colours.

The Corner XL model will be ideal for customers wanting to tuck the tray away in a corner, whilst still being a slightly larger toilet than the already generously sized standard Ariel.

Bedding

Pet owners loved viscose fluff, but it's quite rightly fallen out of favour with those in the know, leaving only paper as a safe alternative...until now!

Our Soft 'n' Safe Bedding is 100% natural fibres from the seed pod of the Kapok tree. The short fibres won't twist and string and are also hypoallergenic, antibacterial and biodegradable. The Pods are perfect for DIY furries: give them a squeeze to crack the pod and the pet will do the rest. They even include edible seeds.

NATURALS

Meadow Menu Main Diets

In 2006 our Naturals brand of small animal treats broke the mould; finally consumers could offer their pets healthier, more stimulating and better quality treats. We then took this principle and applied it to our breakthrough range of main diets. Meadow Menu offers pet owners the chance to feed their pets a better diet that's closer to nature. On top of this the recent growth in the popularity of grain free feeding has been the most significant change to the dog food market since the move from wet to dry and this change is now happening with the diets of fibrevores!

Experts and owners are increasingly concerned about obesity and poor digestive and dental health in rabbits, guinea pigs, chinchillas and degus. The best and simplest way to address all these concerns is by improving a pet's diet. Our three Meadow Menu diets:

- use over 40 natural and grain free ingredients designed to promote good digestive and overall health
- are blended into Quad-shaped pellets, loaded with fibre-rich grasses, which are designed to wear growing teeth and stop selective feeding
- contain no added sugar or sugar-rich ingredients
- are cold-pressed to retain more of their nutrients and encourage the pet's digestive system to work as it was designed to!

Why Grain free?

Most manufactured foods for fibrevores contain large amounts of processed cereal grains and very few other ingredients. Why? Because grains are cheap and rich sources of energy, but also because to create extruded foods you need starch to 'glue' the ingredients together. The heat used also pre-processes the nutrients so they are easier to digest and more of the energy is absorbed by the animal - sounds good, but it's not. Put simply our small animals' digestive systems have also evolved to 'work' at extracting nutrients from unprocessed, low energy, fibre rich food like meadow plants and grasses slowly, throughout the day. Feeding energy rich, easily digestible food to fibrevores is the equivalent of putting aviation fuel into a diesel tractor!

As pets get their energy too easily and quickly from grain based diets, so they often eat less essential hay which can also result in digestive issues. Additionally, if excess starch, sugar and protein is not completely digested in the small intestine it can cause serious short and long term issues for the rest of their digestive system. Grain-based diets also don't provide the same vital teeth-wearing abrasion that hay and grass based diets do which can lead to potential dental issues.

Finally, by leaving cheap grain out we can pack more of the good stuff in. This is important as different plants contain different macro and micro nutrients. These included beneficial phytochemicals (natural chemical compounds found only in plants) including a wide variety of flavonoids, antioxidants and vitamins. So by using over 40 different meadow plants, grasses, vegetables and seeds pets are provided with a wider variety of these important nutrients.

Meadow Hay Cookies

Pet owners are increasingly aware of the importance of feeding their pets a good quality, main diet hay, so much so that the hay market is now divided into two: cheap, bedding hay and high quality forage. For our cookies we take high quality meadow hay from a family farm in Bavaria and compress it into convenient and easy to feed portions.

For the pet owner our cookies are easier to store, less messy to feed and result in less waste. They also contain less dust and allergens.

Pets benefit from the fact that unlike single species grass hays, like Timothy, our hay comes from managed meadows which contain over 20 different species of grass and edible plants. This improves the overall appeal and palatability; plus, ensures the hay provides pets with a better variety of beneficial phyto-nutrients such as antioxidants and flavonoids. The cookies also mean it's easier to ensure pets are given sufficient hay each day which is important for dental health, healthy digestion and overall health and wellbeing.

Our hay cookies give you the opportunity to free-up valuable retail and storage space as they take up only half the volume of most other compressed 1kg packs. The packaging clearly communicates the importance of feeding hay which increases usage and promotes sales under a brand with strong consumer awareness and loyalty.

Worth knowing....

Our meadow hay is barn dried to keep its colour and minimise the loss of essential nutrients like beta carotene and vitamin E. Additional warm air drying and dust extraction also helps to prevent mould spores and respiratory issues for both owner and pet. It also contains over 20 different types of meadow grass, plants and herbs, making it great for health and palatability, including:

NATURALS

Treats

Our herbal/salad mixes are amongst our most popular treats. Many have copied us, but no one can match our quality and range of ingredients, let alone our value for money. These treats are ideal for rabbits, guinea pigs, chinchillas and degus and are healthy enough for daily feeding: indeed the unique flavonoids; plus, being naturally rich in vitamins, minerals and fibre, mean these treats can be really beneficial to a pet's health. New for 2020 we have Fields of Gold, in a bag three times the size of our other mixes, offering pet owners value and convenience.

Small Animal Treats

The grain-free movement we started in 2012 is now really growing in popularity with owners of fibrevores. Of course, grains are still ok in food, but in moderation, however, by taking grain out of those treats that would normally use it, it then allows us to pack in more of the healthier ingredients like veggies, herbs and beneficial seeds.

Small Animal Treats

The market research we do and the customer feedback we see, all tells us that pet owners are looking for treats that really last and make their pets work for their reward. So rather than simply offering minor but multiple variants on the same sticks and extruded treats from multiple brands, with Naturals we offer you the potential to offer your customers a wider variety of treats, many with real USP's. A great example of this are our three new lines, the fun Raspberry 'n' Coconut Cone, the hay-rich Herb 'n' Hay Wheels and the long-lasting Pea 'n' Mint Rollers.

Edible Gnaws & Toys

Fast selling, unique and really beneficial to pets: our range of Naturals gnaws and edible enrichment toys is a must stock. Most are designed to challenge and stimulate pets of all sizes, helping to prevent boredom. Our gnaws are especially useful in helping pets to satisfy a key need: helping to wear growing teeth.

One of the stars of our Naturals range is our unique Nibble 'n' Dig Meadow, which is a real slice of cultivated meadow full of herbs, grasses and edible flowers; rooted in loam and carefully dried. Ideal for allowing rabbits, Guinea pigs, chinchillas and degus to dig and forage like they would in nature.

Equally popular is our Hide 'n' Treat Maze made from our signature hay coated, edible parchment board. Some of the tubes and rings are already prefilled with a hard to remove carrot based filling and marigold petals, but owners of pets of all sizes can fill any of the others with veggies or other treats.

Last and most definitely not least we have our Rollin' Rodent Sand Bath where degus, gerbils, Syrian and dwarf Hamsters can 'wash away' the day's stresses with a roll around in a cooling sand bath. The bathing box is made from edible board coated in meadow hay and contains the special sepiolite bathing sand, which is kinder to the pet's fur than other sands and helps to absorb excess oils. It's supplied with 350g of sand and the whole thing will have a typical life of about six weeks.

NATURAL EATS

Ferret Treats

Ferrets have specific dietary and care demands, and their owners are passionate about ensuring they use the best products, made specifically for their pets. There are many good main diets for ferrets, but the few treats that are available are typically poor quality due to the use of high amounts of vegetable-based and sugar-rich ingredients, dairy products and added salt. Our Chicken & Liver Bites are the first UK branded treats to remedy this with 69% of the treat being chicken meat, fat, liver and egg. These are irresistibly tasty, semi-moist treats that ferrets and their owners will keep coming back for.

SIMPLY NIBBLES

Treats

Our Simply Nibbles brand offers your customers popular and healthy treats that pets keep coming back for. Our chunky bars are made from 100% natural ingredients, without added sugars etc and can be easily broken into smaller pieces for better portion control.

And why not join the crunchy cushion revolution with our crispy treats made from cereals and timothy hay and enriched with added vitamins. Each has a soft filling made from either tropical fruits, such as apricot and pineapple; or apple with real herbs such as parsley and lovage.

Snuffle Forage Mat

There is a growing awareness, from owners of all pet types, of the importance of enrichment products. For most pets the ability to forage for foods and treats is a key aspect of this. Our Snuffle Mat, with its super-soft felt stands, is a great way to offer rabbits and rodents of all sizes this opportunity. Owners will be able to play hide and seek with all types of dried and even fresh foods, such as herbs. The mat is a generous size, can be used both in and outside the pet's home and is hand washable.

Small Animal Activity Toys

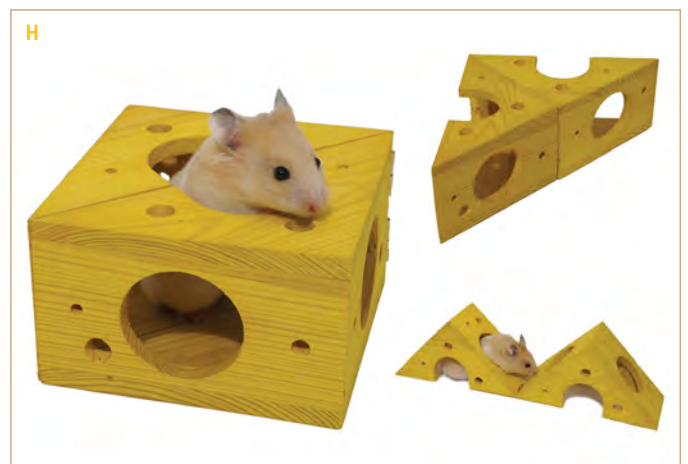

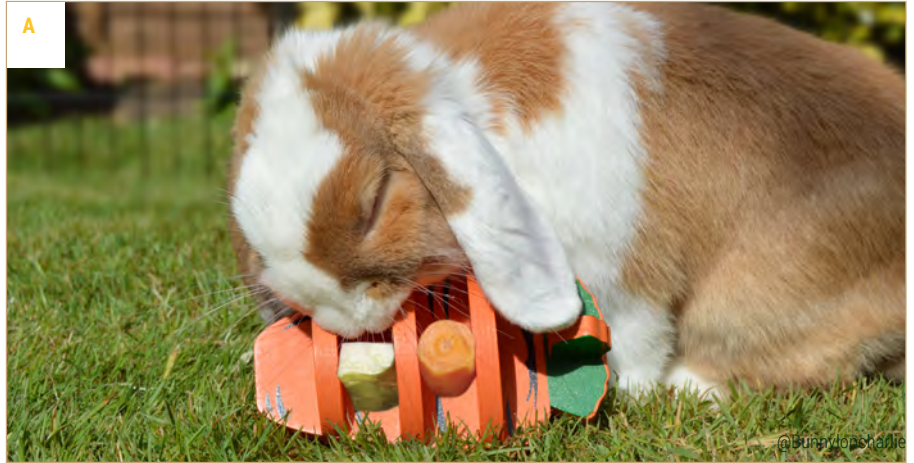

Just because pets are going to chew them it doesn't mean wooden gnaws cannot be fun and colourful – after all it's not the pet that's going to be putting their hand in their pocket!

Small animals love, even need, to chew on wood and our fun toys allow them to satisfy this urge. We've also created designs to stimulate them mentally, so our Grape 'n' Gnow can be loaded with treats and sliced vegetables can be wedged into our chunky 3D Carrot.

The colourful designs and packaging have been created to stand out in store and appeal to your customers, both young and old.

All products are made from pet-safe dyes and materials and are priced to sell!

Edible Activity Dens, Toys and Gnaws

Our wood and alfalfa blended range is now incredibly popular as it's an ideal way to allow pets to fulfil their desire and need to gnaw. Not only does the final product not splinter, it also allows us to create products that would be almost impossible in solid wood.

First up is our new Gingerbread Man hanging gnaw, which is ideal for all small animals.

Our other lines build on this concept with even more innovation: the Donuts are the wood-based gnaw mixture with even more alfalfa (16%) and real carrot "icing", dusted with coconut. The Bunny Buns – which are not just for bunnies - ramp up the alfalfa to 35% with their hard shells filled with a treat centre (flavoured with apple and fenugreek). The Buns offer two different challenges depending on which way they are used: place them flat side down and the pet has to gnaw at the holes to get to the filling, or use the other way around so they roll and wobble!

The next two lines are treats that think they are gnaws: the Treat 'n' Gnaw Carrots are a wood-based gnaw with a filling of real carrot blended with rice starch, to create a treat that's as hard as the rest of the gnaw. The Gnawty 'n' Nice Fruit & Veg treats use this same carrot-based treat mixture with an alfalfa-based top. Naturally flavoured and coloured, these 8cm long carrots and 4.5cm strawberries last and last, and are ideal for all rabbits, Guinea pigs, hamsters, chinchillas and gerbils.

Activity Tents & Tunnels

Our Pop-Up tents and tunnels are unique as pet owners can join two or more tunnels together and join a tunnel to a tent with their integral Velcro tabs. Both products are ideal for indoor or outdoor and provide pets with shelter from rain or sun. The tents, which come with a removable mattress and run ties, are sized 31cm square for the medium and 36cm for the large, while both tunnels are 90cm long.

The polyester fabric is wipe-clean and comes in two popular colours.

SNUGGLES

Affordable luxury is the order of the day (or night!) with our super soft plush beds with signature embroidered paw print. The plush versions are still practical with tough, wipe clean fabric bases as well as being machine washable to 30°C. For muckier rabbits, guinea pigs and ferrets we also have our Tough 'n' Mucky bed made with a durable, wipe clean, outer fabric that's coated inside to stop water and urine reaching the filling.

PET KEEPER PLASTIC TANKS

Multi-purpose tanks which can be used to house smaller pets, as holding tanks during cleaning and for transportation.

The first three sizes have carry handles, the first four hinged lids and all have secure, ventilated lids with access doors.

Sold in assorted packs of five popular colours, each tank comes with a leaflet which guides consumers on the recommended uses for each size. Ideal for merchandising in your small animal, reptile and aquatic departments.

Small Animal Home-time

Small Animal Homes - Pico

Fun and funky for both pet and owner: the Picos not only look great but are also packed full of extra levels, ladders, a tunnel, wheel and even a unique loft hide with easy (but secure) access. These high quality homes also have a 'drop in' water bottle, food dish and a deep base to help ensure litter stays in the pet's home. The 8.5mm bar spacing means that the homes are suitable for mice and dwarf hamsters from 6-8 weeks of age as well as Syrians.

The Picos also have all accessories and parts built in to the top, making cleaning the base really easy.

Small Animal Homes - Pico XL

More and more pet owners are looking for bigger and better homes for their hamsters, so our Pico XL is ideal being 50% larger than the standard Pico. We've achieved this in the most practical manner for most consumers by making the homes taller and adding extra ladders and levels to create an even more exciting and feature packed home.

The XLs have all the same features as the standard, but with a knock-down design they pack down and take even less storage and shelf space in store. The knock-down design doesn't compromise on quality either: we don't use chewable, plastic clips to connect the panels and the gaps at the corners are even narrower than on the main bars, so the XL is still suitable for mice and dwarf hamsters over 6-8 weeks of age.

Small Animal Homes - Abode

Our Abode for dwarf hamsters and mice is a high quality, plastic home with narrow, powder-coated bars in the roof for ventilation making it completely escape proof and even suitable as a breeding cage. It's stylishly appointed with a solid exercise wheel, food dish, sleeping area (which could also be used for sand baths) and our easy to use 'drop in' water bottle. The smooth, solid base is deep enough for an extra deep layer of litter for burrowing.

In addition to our 'classic' blue and orange we also have a stunning silver with translucent blue accessories and a hot, 80's inspired (and now back on trend) vision in pink, green and orange.

All three are presented in eye-catching and informative full colour boxes.

Small Animal Homes - Abode Gerbilarium

The gerbil version of our Abode has all the features and benefits of the dwarf hamster Abode, minus the wheel, but with a much deeper base, chew-proof metal ladders and an all metal wire roof hatch.

Gerbils love to dig and burrow tunnels and our clear base is fantastic for filling with litter to allow them to fulfil this need. The smooth curves of the design don't just look stylish - they also make the home as gnaw proof as possible. The cage is really easy to clean, as the top holds all the mezzanines and accessories so everything is held in one place when you remove it to clean the base. This larger home is also ideal for dwarf hamsters and mice.

NATURALS

For Chickens

During the 'lock down' of 2020/21 pet ownership has sky rocketed and this has not escaped the "grown your own" movement and keeping chickens. Our Henny's treats really benefited from this, so we are pleased to introduce three, unique, herb-based treat supplements to the range. Developed in accordance with one of Germany's top poultry experts, all three are made using only 100% natural ingredients and offer great value in our generous pack sizes.

Henny's Nest Confetti

A glorious mix of five beneficial and aromatic herbs and flowers, designed to be sprinkled on nests. As well as giving the coop a wonderful aroma it allows hens to forage on and off the nest. The strong aromas of lavender, lemon balm and peppermint are known to encourage calmness but discourage rodents and insects, whilst calendula is known for its anti-inflammatory properties and can help improve yolk colour. Rose petals? Well, they just look and smell fantastic! Can also be used in their dust bath for a little spa treatment!

A Henny's Nest Confetti

250g | 3pk | 22754

Henny's Super Herb Booster

A unique blend of thirteen edible herbs and flowers known for being rich in beneficial nutrients found only in plants. These phytochemicals, vitamins and minerals are a great way to naturally supplement the diet of chickens and quails to promote wellness. Mix into the flock's normal daily diet or scatter to encourage foraging. Parsley, marjoram and fennel are widely believed to support laying performance. Sage, tarragon and dandelion are full of micro-nutrients which can help support a healthy immune system, and calendula and rosemary encourage extra-yellow yolks.

B Henny's Super Herb Booster

300g | 3pk | 22755

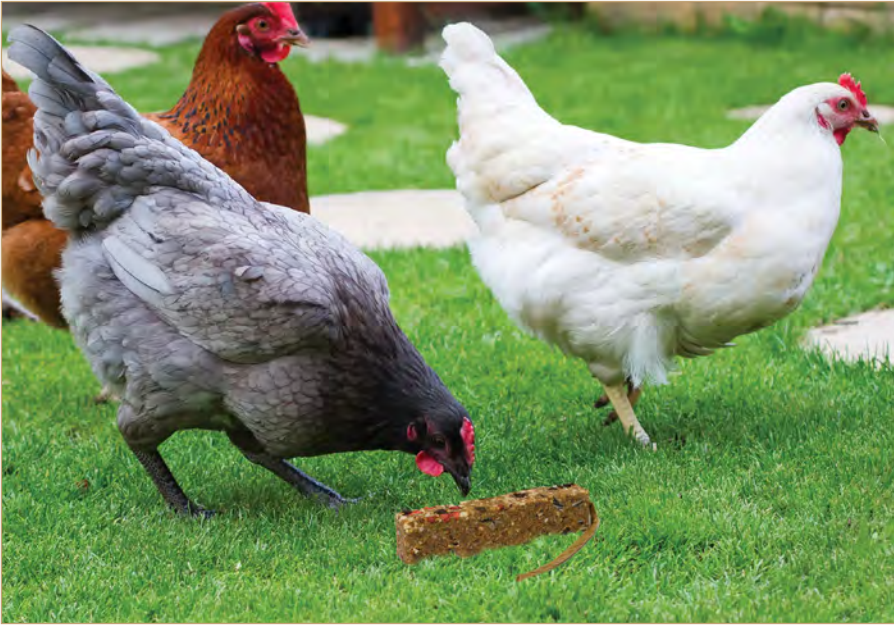

Henny's Power Laying Breakfast

A scrumptious morning (or afternoon!) treat, made from specially selected, natural ingredients designed to support overall wellness, gut health and laying performance. As well as being a tasty, balanced blend of grains and veggies it also contains brewer's yeast, which is a rich source of B-vitamins, antioxidants and minerals. It can also support the immune system and digestive health; plus, is rich in niacin (vitamin B3) which is essential for healthy bones. Diatomaceous earth is also added, which is rich in beneficial minerals and may have anti-parasitic properties and reduce odours. Other beneficial ingredients include linseed, which is rich in omega 3 and 6 to support skin and feather health, and Jerusalem artichoke which is a natural source of inulin, a beneficial gut prebiotic.

BOREDOM BREAKER

Edible Activity Toys

The two sizes of Hide 'n' Treat Chains - which are great for both small animals and birds - are perfect for challenging most sizes of parrot and parakeet. Each of the three 'logs' is hollow allowing owners to hide their pet's favourite treats inside, challenging the bird to find out how to get to them. The small is great for budgies and cockatiels whilst the larger is ideal for medium sized parrots.

The Birdy Branch is made from a pine wood mixture which is pressure formed into a hard branch shape so is ideal for both perching on and slowly destroying! It even contains little depressions for holding pieces of fruit or vegetables. It measures at 30 x 17 x 4.5cm.

SYDECO

Launched in 1985 and still the best looking and best selling of its kind. The Sydeco concept takes the humble plastic plant and creates an ornament with a far greater perceived value. All designs are unique and offer the hobbyist an easy and effective way of creating fantastic displays. For the retailer they are easy to merchandise and as they're self-supporting out of water they are perfect for creating 'dry' aquarium displays to inspire customers, leading to increased sales of both decor and aquariums.

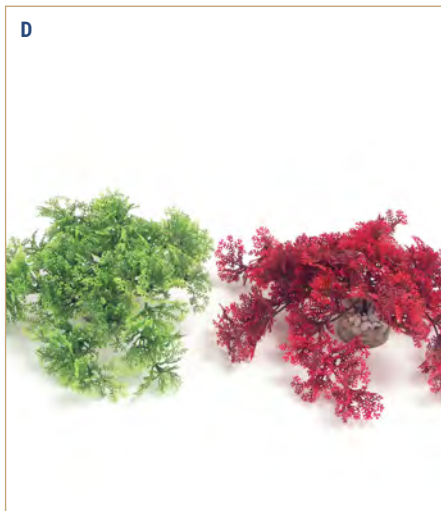

Whilst many purists may still balk at using plastic plants we've worked hard to introduce more natural, multi-tonal colours and designs.

Sydeco is the original and the best, so beware of imitations!

The heavy resin bases mean fish cannot disturb the plants and due to their superior 'bulk', compared to traditional plastic plants, they not only look better but it's also quicker and easier to create fantastic aquascapes. To create effective displays consumers need to both be inspired and see a great selection of plants on shelf – so to maximise sales, more is definitely better!

Coloured Plants

Sydeco is perfect for small tanks as well as large. Smaller aquariums are growing in popularity, but the downside of this is that they are cheaper, require less equipment and hold fewer fish which means less money in your till. So it's even more important to maximise your customers' spending by encouraging them to 'go to town' on décor so they can create a wonderful aquascape which keeps up their interest and reduces their maintenance and for this Sydeco is perfect! Most first time fishkeepers believe they can only put a few plants in a tank, but displays like our trio of 35 litre tanks can help to show them that this doesn't have to be the case.

BLUE RIBBON

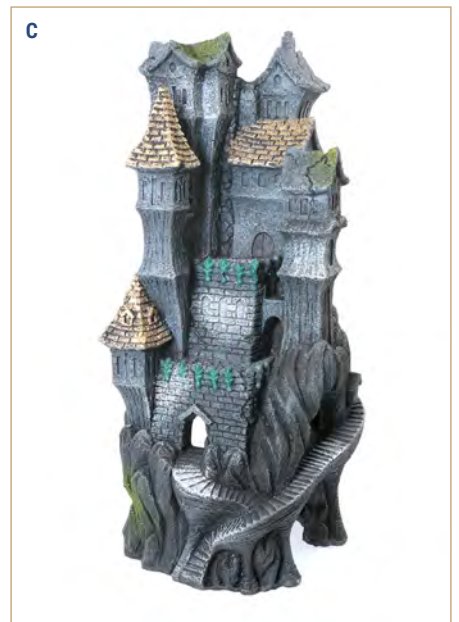

Our 65 diverse designs aim to offer you and your customers a one-stop shop for ornaments: we truly believe we have something for everyone.

We work closely with Blue Ribbon's sculptors and designers to create unique, innovative and attractive designs of great quality. Every one is hand painted to a level of detail you won't see anywhere else. And in this case quality doesn't come at a price: just compare our retail prices to those elsewhere and you'll see our ornaments are priced to sell!

Rock & Wood

Natural rock and wood always looks fantastic in any aquarium, but a lot of people feel more comfortable with a faux version, especially if these designs incorporate 'swim-throughs' and caves; plus, they are guaranteed that they won't affect the water chemistry in any way.

Our 3pc Root Cluster can be used as it's supplied, looking like a single ornament, or the three pieces can be separated to produce a great 'mangrove root' effect. The Trunk & Root designs are ideal for use together to form a 3D back drop and our Mopani Wood with Plants are always best sellers.

In 2018 we introduced five new designs all with additional plants or moss.

Fun & Children's

Just because our fun ranges are mainly for children, or the young at heart, it doesn't mean we sacrifice quality of design or attention to detail. Far from it, we put a lot of thought into creating the most appealing and unique designs possible. We have designs for all ages, including some great action bubblers which look just as good when not connected to an air pump!

NANO Q QUIET AIR PUMPS

Air pumps are necessary to operate air-powered filters and ornaments or an air stone to improve an aquarium's oxygen levels and create a wonderful decorative effect. However, traditional air pumps are noisy, not very compact and have parts that require maintenance or replacement.

Our Nano Q's are a new generation of air pumps which are ultra quiet, super compact, lightweight and virtually maintenance free. They even come with a length of airline and a high quality airstone, and are incredibly cheap to run being only 1.8 or 3.5 watts. The pumps can simply suck to the outside of the aquarium to then run the supplied air stone, or be connected to a filter or air-powered ornament.

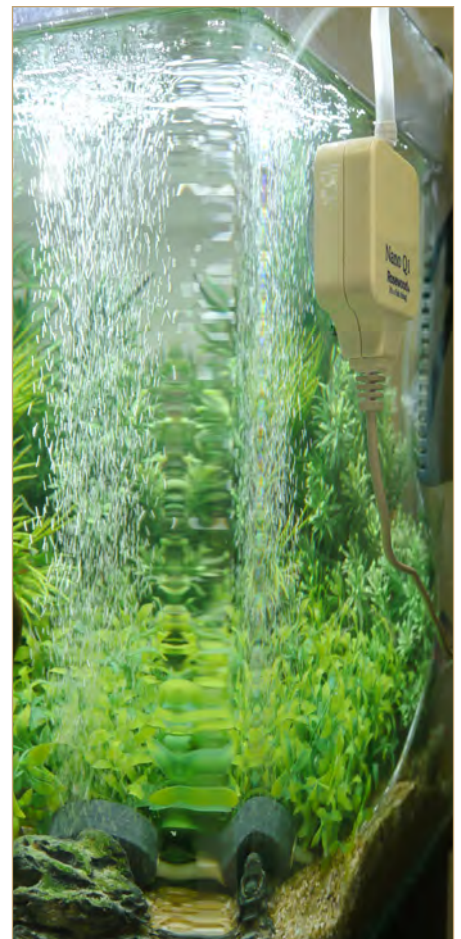

The Q1 is ideal for all aquariums up to 60 litres (30 litres if operating a filter). The Q2 for aquariums up to 120 litres (60 if operating a filter). And unlike traditional pumps they don't suffer from the effects of back-pressure, so full output is maintained down to their maximum operating depth of 60cm.

EVOLUTION AQUA PURE

Pure products are small (or very large in the case of pond bomb!) polymer balls with a jelly-like consistency. Each ball has absorbed various types of beneficial bacteria in their millions and, with enzymes that are also contained within the balls, these are released into the aquarium or pond as the polymer balls gradually dissolve into the water. These bacteria boost the numbers of the ones already found in the biological filter that breakdown the inorganic and toxic ammonia and nitrites. But the main aim of Pure is to breakdown the organic waste that builds up on the aquarium or pond floor and within the filter which can, in some cases, then result in cloudy water.

For best results Pure Aquarium is best used once a week and a single tub will typically last four months when used in a 60 litre aquarium. The Pure Pond is used once a month as required and a single tub will treat up to 10,000 litres. Both products are best used with filters and can help to establish new biological filters.

The Pond Bomb is a supersized version of the Pure balls and can be used in any pond (with or without filtration) to reduce the build up of organic waste and help to clear cloudy water (but not necessarily 'green' water) as well as reducing levels of ammonia and nitrite. The single Pond Bomb treats any sized pond up to 20,000 litres once and is used as required.

The Pure Aquarium Bomb is an easy, safe and effective way to improve water quality in all aquariums. The millions of beneficial bacteria in the clear ball quickly help establish new filters with the nitrifying bacteria required to break down harmful ammonia and nitrite.

Additionally, in established aquariums the bomb combats water quality emergencies, for example when the existing filter colony has been damaged by being washed in tap water or after using medication or a power cut, and finally as a boost when introducing new fish. A single dose ball for aquariums up to 200 litres.

FEEDING TIME

Deluxe Feeders

The wild bird market is now a year round opportunity for most retailers; plus, more people are looking to place a greater number of feeders in their garden. Our Feeding Time range offers you the chance to buy a concise range of bestselling feeder designs and offer your customers unrivalled value and great quality.

Our deluxe feeders use quality materials and look fantastic in any garden. The small sizes have a 20cm fill and can hold seed, peanuts, fat balls and nyjer seed, while the large, for seed, has a 35cm fill.

All four feeder types are supplied in cases of three stunning assorted colours: black mica, green mica and brushed bronze. They are all easy to fill and resistant to damage from squirrels. The seed feeders have metal ports and use 1.4mm thick polycarbonate tube while the peanut feeder uses 0.9mm thick stainless steel mesh. Hold them in your hands and compare to alternatives at the same price or more and you'll instantly appreciate the difference.

Squirrel Proof Lanterns

Our squirrel proof range is extremely popular due to its incredible value and the fact that more and more people want a feeder that squirrels and larger nuisance birds, like pigeons, cannot feed from or destroy.

The improved closure caps are designed to be secure against squirrels, but easy for us. Both finishes (black mica and hammered bronze) are durable and look great in the garden.

Feeding Station

Our Feeding Station is great value and attractively boxed (which is important as wild bird products are popular as gifts). It has four hangers, a bird bath/drinker and a mesh feeding tray. The 22mm diameter pole has a high quality hammered bronze finish which looks great with all our feeders. Quick, tool-free assembly to a height of 1.85m above the ground.

Classic

Whilst some are happy with functionality only, many people also want their wild bird feeders to be attractive and decorative. 'Shabby Chic' is a style currently very popular both in the home and garden, so we've tapped into this with our butterfly motified feeders which have an aged, 'antique' white powder coated finish.

At home in almost any setting and making an ideal gift, each feeder also has the benefit of helping to keep squirrels and nuisance birds from its contents. The feeders are easy to fill and the centres can be removed for easier cleaning. Each feeder is 19cm in diameter.

Antique Lanterns

Your customers will love these metal feeders which are inspired by Victorian lamps. The wire styling allows smaller birds to feed easily (although these feeders are not specifically designed to be squirrel proof) and the built-in tray helps to reduce seed waste and can also be filled with mealworms and scraps. All three types have a lovely antique brushed bronze finish.

BRAMBLES

Hedgehog Food

Our native hedgehog is now classed as endangered; changes to our rural environments and the increasing publicity regarding their plight has resulted in increased complementary feeding and the nation's gardens becoming an important haven. The days of feeding bread and milk, both harmful in the long and short term, are thankfully all but gone as people have embraced the idea of feeding commercially made foods. But many of these are not all they should be. Hedgehogs typically forage for protein-rich insects, but a lot of commercial diets are rich in sugar (honey/dried fruit), starch (grains) and fat which can lead to dental issues, obesity and liver disease.

Mealworms were also seen as a fitting ingredient but it's now believed that their long term use could be a major reason for the growing number hedgehogs being seen by wildlife rescues and hospitals with Metabolic Bone Disease (MBD); a broad term to describe the weakening, softening and deformation of the bones. This is caused by a change in the normal blood calcium levels, which will eventually lead to calcium being leached from the bones. Often the cause of this is too much phosphorus in the diet. Ideally the ratio of calcium to phosphorus in a hedgehog's diet should be 2:1. However, many commercial diets have phosphorus rich ingredients such as mealworms, peanuts and sunflower seeds. And when presented as a mixture, rather than an extruded nugget, this is made worse as hedgehogs pick out these ingredients at the expense of others. It can also lead the public to believe they can offer these ingredients as individual foods.

Brambles have addressed all these concerns by creating a dry crunchy nugget which is perfectly sized for hedgehogs and great for dental health; plus, a meaty tinned food which is great for drier weather and with younger and convalescing animals.

- Approved by wildlife hospitals
- Highly palatable and nutritious
- Poultry as main protein source
- Added vitamins and minerals
- Do not contain phosphorus-rich or sugar-rich ingredients
- Suitable for badgers and foxes

Swan & Duck Food

For generations both young and old have enjoyed feeding waterfowl with pieces of bread. But it's now agreed that bread has many drawbacks: minimal nutritional benefit; calorific and filling thus reducing foraging for a typical, vitamin and mineral rich natural diet and the potential for fouling water and attracting vermin. At its most extreme the nutritional aspects of this can lead to a condition called Angel Wing where the flight feathers grow excessively in relation to muscle leading to the appearance of deformed wings and preventing flight.

Those in the know are not missing out and avoiding feeding birds; they are just doing the responsible thing and taking Brambles Floating Swan & Duck Food to the park. Being highly palatable, nutritious and balanced to the needs of water fowl the food is approved by wildlife hospitals and rescues. As it floats it helps avoid over feeding and pollution, and typically being 25% less dense than other foods means you get to see them feed for longer!
